- 1: Enrollment in ENGL 1004 can be waived if student is approved to do so by the TU Writing Program after completing the online English proficiency questionnaire. Questionnaire must be completed at least 2 weeks before the semester a student wishes to start enrolling in at TU. If student is not required to take ENGL 1004 after completing the online English proficiency questionnaire, 3 hours of general elective credit can be taken in later semesters at TU.
- 2: Technical Electives: All technical electives must be at the 2000 level or higher from the Engineering & Natural Sciences College for which the student has satisfactorily completed the prerequisites in petroleum engineering, chemistry, physics, mathematics, or statistics. Course must be approved by faculty advisor.
- 3: Geosciences Electives: 3 courses selected from the following at the 3000 level or above: GPHY 4003, GPHY 4023, GPHY 4033, GPHY 4063, GEOL 4513, GEOL 4523, GPHY 5023, or any 3000- or 4000-level geology, geography, or geophysics elective selected with approval of advisor.
- 4: Geology Curriculum includes a required six (6) hour Field Geology class which must be taken at another institution. This requirement is usually satisfied by attending a six-week summer field camp and is typically taken after completing the following courses: GEOG 3053, GEOL 3151, GEOL 3153, GEOL 3063, GEOL 3061, and GEOL 4144.

#### Additional TU Program Information:

- All external courses must have the international grade equivalent of a C or higher to transfer into TU. Inclusion of an equivalency on this agreement does not guarantee transfer eligibility if an individual course grade does not meet the minimum grade requirement.
- In order to receive a degree in geosciences, students must complete all geology, geography and geophysics courses with a grade of C or higher and must earn an overall G.P.A. of at least 2.0.
- Foundation courses in geosciences are MATH 2014, CHEM 1013, CHEM 1011, GEOL 1014, and PHYS 2053. Minimum GPA required in Foundation Courses is 2.5 or the international equivalent for geoscience majors.
- If an applicant does not have all the math and science coursework at the time of entrance, TU cannot guarantee the student will be able to graduate in 2 years and may need to be here additional time due to prerequisites needed for our degree plans. If a student is deficient in a general education course, it may still be possible to graduate in 2 years, but the student may need to take extra courses in summer to finish on time.
