

THE UNIVERSITY *of*
TULSA
**FIRST DESTINATION
OUTCOMES REPORT**

2022 - 2023

THE UNIVERSITY OF TULSA
*Center for Career Development and
Professional Engagement*

EXECUTIVE SUMMARY & METHODOLOGY

The First Destination Survey is administered annually by The University of Tulsa Center for Career Development and Professional Engagement. The survey asks graduates to identify primary post-graduation outcome status. The survey content and data collection procedures are in compliance with National Association of Colleges and Employers (NACE) standards and guidelines.

Data was collected from degree candidates prior to graduation and through follow-up emails sent to graduates post-graduation. Graduates who had already completed the survey were invited to update their previous response if their post-graduation status had changed. Outcome information was collected from faculty members, telephone calls, text messages, and web research. A search was conducted via social media, primarily LinkedIn, to find graduates who had not reported any data. It is important to note that not all respondents answered every question. Data was collected through December 31, 2023.

Knowledge Rate is defined by NACE as the percent of graduates for which The University of Tulsa has reasonable and verifiable information concerning the graduates' post-graduation career activities. The knowledge rate refers to basic information about career outcomes.

Career Outcome Rate includes employed (full-time, part-time, entrepreneur, freelance, postgraduate fellowship, other), military services, volunteer service (e.g., Peace Corps, mission work), continuing education, and taking time off.

The results for the class of 2022-2023 presented in this report include students who were on the official graduation list and were awarded a degree from The University of Tulsa during the 2022-2023 academic year; this includes Summer 2022, Fall 2022, and Spring 2023 graduates. In total, 982 graduates are included in this report.

97%*

SUCCESS RATE

TU's all-time highest placement rate for the second year in a row!

compared to NACE's 89% national career outcome rate for 2021-2022.
